INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

REC'D 19 APR 2005

WIPO PCT

Applicant's or agent's file reference PE-18794-PCT		FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)
International application No. PCT/KR2003/000299	International filing date (day/month/year) 12 FEBRUARY 2003 (12.02.2003)	Priority date (day/month/year) 13 DECEMBER 2002 (13.12.2002)
International Patent Classification (IPC) or national classification and IPC IPC7 C23F 13/00		
Applicant KOREA POWER ENGINEERING COMPANY, INC. et al		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 3 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of _____ sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 26 JANUARY 2004 (26.01.2004)	Date of completion of this report 29 MARCH 2005 (29.03.2005)
Name and mailing address of the IPEA/KR  Korean Intellectual Property Office 920 Dunsan-dong, Seo-gu, Daejeon 302-701, Republic of Korea Facsimile No. 82-42-472-7140	Authorized officer KIM, Seong Kon Telephone No. 82-42-481-5527 

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/KR2003/000299

I. Basis of the report

1. With regard to the elements of the international application:*

- ☒ the international application as originally filed
- ☐ the description:
 pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____
- ☐ the claims:
 pages _____, as originally filed
 pages _____, as amended (together with any statement) under Article 19
 pages _____, filed with the demand
 pages _____, filed with the letter of _____
- ☐ the drawings:
 pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____
- ☐ the sequence listing part of the description:
 pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

- These elements were available or furnished to this Authority in the following language English which is
- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☒ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets _____

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this opinion as "originally filed." and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item I and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION

International application No.

PCT/KR2003/000299

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-13	YES
	Claims	None	NO
Inventive step (IS)	Claims	1-13	YES
	Claims	None	NO
Industrial applicability (IA)	Claims	1-13	YES
	Claims	None	NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

- D1: JP 01-184290 A (THOSIBA CORP.) 21 July 1989 (a family of KR 1989-12148 A identified in the international search report)
D2: KR 1992-2632 U (KIM, YONG SIK) 25 February 1992
D3: JP 11-217685 A (SATO KOGYO CO., LTD.) 10 August 1999.

1. Novelty and Inventive Step

The inventions as defined in claims 1 to 8 are apparatuses for cathodic protection in an environment where thin film corrosive fluids are formed, which protects from corrosion an object exposed to the thin film corrosive fluids, by artificially adjusting a potential of the object, the apparatus comprising a DC power supply and an anodic assembly which includes an insulating filter member, an anodic member, an electrode lead line, and an absorption conductive member. The inventions as defined claims 9 to 13 are methods comprising the steps of: providing an anodic assembly, installing the anodic assembly, forming a resin coating layer on the exposed surface of the object to be protected, and flowing a current between the anodic member of the anodic assembly and the cathode.

D1 discloses a cathodic protection apparatus comprising a sacrificial anode for preventing galvanic corrosion in a sea water circulation system of an all-titanium heat exchanger. D2 discloses a coated anode jig for electroplating. D3 discloses a method and an apparatus for corrosion protection by allowing a protective current to flow from an external power source through the object to be protected which is exposed to an atmospheric environment and whose surface has a coating film, where an anode is provided to the coating film.

No individual citations disclose the anodic assembly, in a thin film corrosive fluids environment, comprising a filter member and a absorption conductive member. Therefore, the subject matter of claims 1 to 13 is considered to be novel (PCT Article 33(2)). Also, since none of the above citations teach or fairly suggest the anodic assembly, in a thin film corrosive fluids environment, comprising the filter member and the absorption conductive member, the subject matter of claims 1 to 13 seems to be inventive (PCT Article 33(3)).

2. Industrial applicability

All claims are considered to be industrially applicable (PCT Article 33(4)).
